

MIXON

CAR CARE

ACTIVE FOAM

for non-contact washing

cc.mixon.ua

ECOLOGICAL

ACTIVE FOAM

M-805 ACTIVE FOAM

Concentrated detergent for professional car and truck washing. Forms a firm foam and rinses off easily, leaving a protective film on the car body. It has no effect on aluminum, chrome and plastic parts. The chemical composition is safe for the environment and completely harmless to the skin of hands.

Method of Application:

1. In summer, cool down dark, old or rusty paintwork with water;
2. If the car is heavily soiled, it is recommended to knock off the dirt with an AHF;
3. Spray the composition on the dirty surface from bottom to top, keep it for a few minutes;
4. Using a high-pressure washing machine, wash the car, starting from bottom to top with horizontal movements;
5. Perform a final rinse of chemical residues from the car body, rinsing it with clean water.

Do not allow the chemistry to dry on the car body. Do not apply on the surface having temperature higher than 30°C. Avoid working in direct sunlight.

Dilution:**Contactless washing:**

Foam nozzle: 1:10 L – 1:15 L;
Sprayer: 1:100 – 1:150.

Characteristics:

- The product has a high dilution ratio, which ultimately results in a 30% savings in chemical costs;
- Forms a protective film on the car body;
- Does not affect aluminum, chrome plated and plastic parts;
- The product easily cleans any kind of dirt: grease, oil, smog, insects, etc.;
- The product contains surfactants that are compatible with any water treatment system.

Packaging:

Bottle: 1.1 kg.
Canister: 7, 14, 22, 28 kg.

ALL-SEASON

ACTIVE FOAM

M-806 ACTIVE FOAM

Concentrated detergent with a wide range of applications, removes the most persistent road pollution (dust, oils, lubricants, insect tracks, wood resin and clay). Used for contactless washing of cars and trucks. Chemical composition without phosphates and solvents is safe for the environment, harmless for health.

Method of Application:

1. In summer, cool down dark, old or rusty paintwork with water;
2. If the car is heavily soiled, it is recommended to knock off the dirt with an AHF;
3. Spray the composition on the dirty surface from bottom to top, keep it for a few minutes;
4. Using a high-pressure washing machine, wash the car, starting from bottom to top with horizontal movements;
5. Perform a final rinse of chemical residues from the car body, rinsing it with clean water.

Do not allow the chemistry to dry on the car body. Do not apply on the surface having temperature higher than 30°C. Avoid working in direct sunlight.

Dilution:**Automatic washing:**

Recommended dilution: 20-40 g per vehicle.

Contactless washing:

Foam nozzle: 1:4 L – 1:7 L;
Sprayer: 1:40 L – 1:70 L.

Characteristics:

- The product has a high dilution ratio, which ultimately results in a 30% savings in chemical costs;
- Forms a protective film on the car body;
- Does not affect aluminum, chrome plated and plastic parts;
- The product easily cleans any kind of dirt: grease, oil, smog, insects, etc.;
- The product contains surfactants that are compatible with any water treatment system.

Packaging:

Bottle: 1.1 kg.
Canister: 6, 12, 22, 26 kg.
Barrel: 220 kg.

STRONGLY FOAMING

ACTIVE FOAM

M-807 ACTIVE FOAM

Strongly concentrated detergent for professional car and truck washing. Forms a firm foam and rinses off easily, leaving a protective film on the car body. It has no effect on aluminum, chrome and plastic parts. The chemical composition is safe for the environment and completely harmless to the skin of hands.

Method of Application:

1. In summer, cool down dark, old or rusty paintwork with water;
2. If the car is heavily soiled, it is recommended to knock off the dirt with an AHF;
3. Spray the composition on the dirty surface from bottom to top, keep it for a few minutes;
4. Using a high-pressure washing machine, wash the car, starting from bottom to top with horizontal movements;
5. Perform a final rinse of chemical residues from the car body, rinsing it with clean water.

Do not allow the chemistry to dry on the car body. Do not apply on the surface having temperature higher than 30°C. Avoid working in direct sunlight.

Dilution:**Automatic washing:**

Recommended dilution: 10-15 g per vehicle.

Contactless washing:

Foam nozzle: 1:5 L – 1:10 L;
Sprayer: not recommended.

Characteristics:

- The product has a high dilution ratio, which ultimately results in a 30% savings in chemical costs;
- Forms a protective film on the car body;
- Does not affect aluminum, chrome plated and plastic parts;
- The product easily cleans any kind of dirt: grease, oil, smog, insects, etc.;
- The product contains surfactants that are compatible with any water treatment system.

Packaging:

Bottle: 1,2 кг.
Canister: 7, 14, 24, 29 кг.

HIGHLY CONCENTRATED

ACTIVE FOAM
CONCENTRATE**M-815** ACTIVE FOAM

Highly concentrated detergent for professional car and truck washing. Forms a firm foam and rinses off easily, leaving a protective film on the car body. Easily cleans all types of dirt: grease, oil, smog, insects, etc. Does not have any effect on aluminum, chrome and plastic parts.

The chemical composition is safe for the environment, completely harmless to the skin of hands.

Method of Application:

1. In summer, cool down dark, old or rusty paintwork with water;
2. If the car is heavily soiled, it is recommended to knock off the dirt with an AHF;
3. Spray the composition on the dirty surface from bottom to top, keep it for a few minutes;
4. Using a high-pressure washing machine, wash the car, starting from bottom to top with horizontal movements;
5. Perform a final rinse of chemical residues from the car body, rinsing it with clean water.

Do not allow the chemistry to dry on the car body. Do not apply on the surface having temperature higher than 30°C. Avoid working in direct sunlight.

Dilution:**Automatic washing:**

Recommended dilution: 10-30 g per vehicle.

Contactless washing:

Foam nozzle: 1:10 L – 1:25 L.

Characteristics:

- The product has a high dilution ratio, which ultimately results in a 30% savings in chemical costs;
- Forms a protective film on the car body;
- Does not affect aluminum, chrome plated and plastic parts;
- The product easily cleans any kind of dirt: grease, oil, smog, insects, etc.;
- The product contains surfactants that are compatible with any water treatment system.

Packaging:

Bottle: 1,2 kg.

Canister: 7, 14, 24, 29 kg.

BUDGETARY

ACTIVE FOAM

M-816 ACTIVE FOAM

Highly foaming detergent for contactless washing of cars and trucks. The detergent forms a persistent active foam on the car body. The composition of the product is compatible with all types of waxes. The chemical composition is phosphate-free and solvent-free, harmless to health. These qualities make it indispensable when used in closed or poorly ventilated areas. Recommended for use in summer.

Method of Application:

1. In summer, cool down dark, old or rusty paintwork with water;
2. If the car is heavily soiled, it is recommended to knock off the dirt with an AHF;
3. Spray the composition on the dirty surface from bottom to top, keep it for a few minutes;
4. Using a high-pressure washing machine, wash the car, starting from bottom to top with horizontal movements;
5. Perform a final rinse of chemical residues from the car body, rinsing it with clean water.

Do not allow the chemistry to dry on the car body. Do not apply on the surface having temperature higher than 30°C. Avoid working in direct sunlight.

Dilution:**Automatic washing:**

Recommended dilution: 20-40 g per vehicle.

Contactless washing:

Foam nozzle: 1:3 L – 1:6 L;
Sprayer: 1:30 L – 1:60 L.

Characteristics:

- Ideal for use in enclosed or poorly ventilated areas;
- Product is compatible with all types of waxes;
- Forms a large amount of foam when applied;
- Product easily cleans all types of dirt: grease, oil, smog, insects, etc.;
- Product contains surfactants that are compatible with all water treatment systems.

Packaging:

Bottle: 1,1 kg.
Canister: 7, 13, 23, 28 kg.

ACTIVE FOAM FOR SELF-SERVICE WASHES

M-817 ACTIVE FOAM

Highly concentrated detergent specially formulated for use in self-service car washes. Easily removes road dirt, dust, oil, insect marks. It has a high level of foaming, easily rinsed from the surface. Works great on car disks, washing off stubborn dirt and brake pad deposits. Provides a great shine to the paintwork. Does not harm aluminum, chrome, rubber and other car surfaces.

Method of Application:

1. In summer, cool down dark, old or rusty paintwork with water;
2. Using a high-pressure washer, wash the car, starting from the bottom upwards with horizontal movements;
3. Perform a final rinse of chemical residues from the car body by rinsing it with clean water.

Do not allow the chemistry to dry on the car body. Do not apply on the surface having temperature higher than 30°C. Avoid working in direct sunlight.

Dilution:

Self-service car wash;
Pre-dilution: 1:2 L – 1:4 L.

Characteristics:

- Ideal for use in self-service car washes;
- Forms a large amount of foam when applied;
- Product easily cleans all types of dirt: grease, oil, smog, insects, etc.;
- Product contains surfactants that are compatible with all water treatment systems.

Packaging:

Bottle: 1,1 kg.
Canister: 7, 13, 23, 28 kg.

WAX FOAM

ACTIVE FOAM

M-821 NANO 2K ACTIVE FOAM

Concentrated composition with liquid wax and strong cleaning effect for non-contact washing of cars and trucks.

The presence of liquid wax gives two advantages at once: it does not take time to wax, because it occurs during the washing process; due to rapid waxing of the surface, water consumption is reduced.

It also effectively removes any kind of dirt from the body surface. Safe for easily fused car wheels.

Method of Application:

1. In summer, cool down dark, old or rusty paintwork with water;
2. If the car is heavily soiled, it is recommended to knock off the dirt with an AHF;
3. Spray the composition on the dirty surface from bottom to top, keep it for a few minutes;
4. Using a high-pressure washing machine, wash the car, starting from bottom to top with horizontal movements;
5. Perform a final rinse of chemical residues from the car body, rinsing it with clean water.

Do not allow the chemistry to dry on the car body. Do not apply on the surface having temperature higher than 30°C. Avoid working in direct sunlight.

Dilution:

Foam nozzle: 1:5 L – 1:8 L.

Characteristics:

- Does not affect aluminum, chrome and plastic parts;
- Recommended for use in hard water;
- Product easily cleans all types of dirt: grease, oil, smog, insects, etc.;
- Product contains surfactants that are compatible with all water treatment systems.

Packaging:

Bottle: 1 kg
Canister: 6 kg.

FOR HARD WATER

ACTIVE FOAM

M-820 ACTIVE FOAM 2K

Concentrated 2K composition with strong cleaning effect for contactless washing of cars and trucks. It can also be used for washing the engine and the space under the hood of the car. Effectively removes any kind of dirt from the surface of the body and engine. Safe for light-alloy wheel disks of the car. Recommended for use in hard water.

Method of Application:

1. In summer, cool down dark, old or rusty paintwork with water;
2. If the car is heavily soiled, it is recommended to knock off the dirt with an AHF;
3. Spray the composition on the dirty surface from bottom to top, keep it for a few minutes;
4. Using a high-pressure washing machine, wash the car, starting from bottom to top with horizontal movements;
5. Perform a final rinse of chemical residues from the car body, rinsing it with clean water.

Do not allow the chemistry to dry on the car body. Do not apply on the surface having temperature higher than 30°C. Avoid working in direct sunlight.

Dilution:**Automatic washing:**

Recommended dilution: 10-20 g per vehicle.

Contactless washing:

Foam nozzle: 1:5L – 1:8 L;
Sprayer: 1:50 L – 1:80 L.

Characteristics:

- Recommended for use washing car engine and under hood space;
- Does not affect aluminum, chrome and plastic parts;
- Recommended for use in hard water;
- Product easily cleans any type of dirt: grease, oil, smog, insects, etc.;
- Product contains surfactants that are compatible with all water treatment systems.

Packaging:

Bottle: 1,1 kg.
Canister: 6, 13, 27 kg.

FOR MEDIUM HARD WATER

ACTIVE FOAM

M-822 ACTIVE FOAM 2K

Concentrated 2K composition with high level of foaming for contactless washing of cars and trucks. It does not damage body elements made of rubber, plastic and chrome.

The product easily removes all types of contaminants: oil, petroleum, smog, insect traces, wood resin and clay. It does not leave white streaks on the surface of a clean car. Recommended for use in hard water.

Method of Application:

1. In summer, cool down dark, old or rusty paintwork with water;
2. If the car is heavily soiled, it is recommended to knock off the dirt with an AHF;
3. Spray the composition on the dirty surface from bottom to top, keep it for a few minutes;
4. Using a high-pressure washing machine, wash the car, starting from bottom to top with horizontal movements;
5. Perform a final rinse of chemical residues from the car body, rinsing it with clean water.

Do not allow the chemistry to dry on the car body. Do not apply on the surface having temperature higher than 30°C. Avoid working in direct sunlight.

Dilution:**Automatic washing:**

Recommended dilution: 20-40 g per vehicle.

Contactless washing:

Foam nozzle: 1:3 L – 1:6 L;
Sprayer: 1:30 L – 1:60 L.

Characteristics:

- Does not affect aluminum, chrome and plastic parts;
- Recommended for use in hard water;
- Product easily cleans all types of dirt: grease, oil, smog, insects, etc.;
- Product contains surfactants that are compatible with all water treatment systems.

Packaging:

Bottle: 1,1 kg.

Canister: 6, 13, 27 kg.

FOR EXTREME DIRT

ACTIVE FOAM

M-825 ACTIVE FOAM 2K

High quality 2K composition with high foaming. Multifunctional product is recommended for washing cars, refrigerators, tents, engine washing. It has a strong effect on any type of dirt. Does not leave white streaks on the surface of a clean car. Recommended for use in hard water.

Method of Application:

1. In summer, cool dark, old or rusty paints with water;
2. If the vehicle is heavily contaminated, it is recommended to knock down dirt using the AED;
3. Spray the compound on the contaminated surface from bottom to top;
4. Using a high-pressure washer, wash the car, starting from the bottom up with horizontal movements;
5. Perform final washing of chemical residues from the car body by rinsing it with clean water.

Do not allow the chemistry to dry on the car body. Do not apply on the surface having temperature higher than 30°C.

Avoid working in direct sunlight.

Dilution:**Automatic washing:**

Recommended dilution: 10-20 g per vehicle.

Contactless washing:

Foam nozzle: 1:8 L – 1:12 L;
Sprayer: 1:80 L – 1:120 L.

Characteristics:

- The product has a high dilution ratio, resulting in a 30% savings in chemical costs;
- Recommended for use washing the car engine and the space under the hood;
- Does not affect aluminum, chrome and plastic parts;
- Recommended for use in hard water;
- The product easily cleans any kind of dirt: grease, oil, smog, insects, etc.;
- The product contains surfactants that are compatible with any cleaning system.

Packaging:

Bottle: 1,2 kg.
Canister: 7, 14, 23, 29 kg.
