Wiping cloth

ABSORBENT

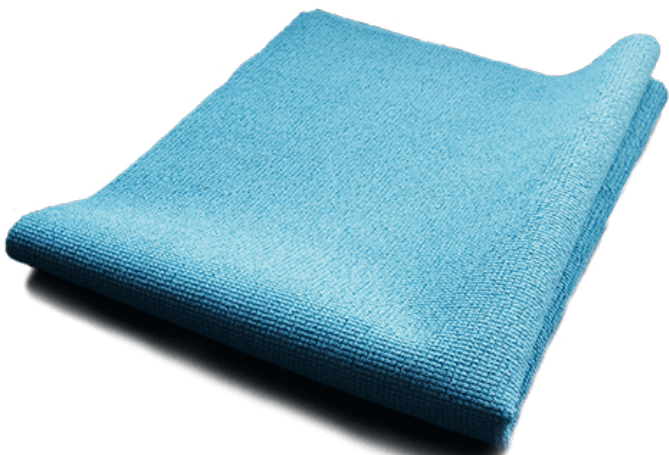

High-quality abrasive material for removing water from paintwork. Made of synthetic material of special strength. It has excellent absorbent properties, is convenient to work with, and is quite durable. For more comfortable use, place the new cloth in warm water for 20 minutes, then wring it out several times. The cloth will become soft and easy to use.

Material: 100% polyamide.

Size: 44 cm x 54 cm.

Cloth

UNIVERSAL

High-quality wiping material for wiping paintwork and for cleaning the interior of the car. Made of synthetic material of special strength. It has excellent absorbent properties, easy to work with, quite durable. Quickly cleans the surface without the use of chemical cleaners, removes water and embedded dirt. The wiped surface becomes clean, dry, shiny, without streaks and lint.

Material: 75% microfiber and 25% polyurethane

Size: 46 cm x 56 cm.

Cloth **POLISHING**

Wiping material for cleaning and polishing the body, interior and windows of the car. It is based on microfiber and has especially soft and fluffy fibers. It has excellent absorbent properties, high cleaning power, durable. It is used in cases where sponges, absorbent fabrics or paper towels are used. It can be used both dry and wet. When removing moisture and using on wet surfaces, the material must be squeezed more often so that it retains its absorbency performance. When removing dust and dirt, at the end of the work, the material must be thoroughly washed and rinsed. If necessary, you can wash in warm water manually or in a washing machine using a weak detergent solution. Boiling and the use of conditioning additives are prohibited during washing. Do not bleach, do not stroke.

Material: 80% polyester and 20% polyamide.

Size: 40 cm x 40 cm.

Universal cloth
ZAMSHA

Heavy duty wiping material for cleaning, washing and removing moisture from various surfaces. Made of artificial suede. The three-dimensional structure of micropores increases absorbency several times compared to fabric materials. It has a number of advantages: it does not leave stains and villi, does not require rubbing dry. Perfectly removes fingerprints, polishes any smooth surfaces, especially glass and mirrors. Does not crumble or stratify. It is also characterized by high resistance to aggressive environments, is not afraid of drying.

Material: 65% polyamide and 35% polyurethane.

Size: 44 cm x 54 cm.

Universal cloth

ZAMSHA PERFORATE

Perforated heavy-duty wiping material for cleaning, washing and removing moisture from various surfaces. Made of artificial suede with perforation, making it easy to twist. The three-dimensional structure of micropores increases absorbency several times compared to fabric materials. It has a number of advantages: it does not leave stains and villi, does not require rubbing dry. Perfectly removes fingerprints, polishes any smooth surfaces, especially glass and mirrors. Does not crumble or stratify. It is also characterized by high resistance to aggressive environments, is not afraid of drying.

Material: 65% polyamide and 35% polyurethane.

Size: 40 cm x 55 cm.
